PROFESSIONAL EXPERIENCE

Full-Stack Developer (Project-Based) | Freelance Early 2024 - Present
Lahore, Punjab, Pakistan

- Built full-stack web apps using React, Node.js, and Supabase to streamline workflows.
- Developed REST APIs with Express and PostgreSQL for smooth data handling.
- Designed MongoDB schemas to support flexible and efficient data models.
- Created modular React components with Zustand and TypeScript.
- Used Git for version control and clean collaborative development.
- Styled responsive UIs with Tailwind CSS for cross-device consistency.
- Added smooth UI transitions with Framer Motion animations.
- Worked with clients to ensure features met project requirements.

PROJECTS

GlucoTrace – Diabetes Tracking Web App

- Developed a fast, user-friendly platform to log and visualize blood glucose levels, reducing entry time by **70%**.
- Integrated interactive charts for trend analysis and informed decision-making.
- Achieved **80% code reusability** with **modular React components**, improving **maintainability** and **scalability**.
- Secured user data with Supabase authentication and role-based access.
- **Technologies:** React.js, TypeScript, Tailwind CSS, Node.js, PostgreSQL, Supabase, Zustand, Zod, Chart.js, Material UI

ComposeAI – AI-Powered Email Assistant

- Developed a web-based tool that helps users draft emails up to 5x faster using **Gemini-driven suggestions** and tone personalization.
- Enabled **secure Gmail integration** via **OAuth2**, providing seamless email connectivity without manual configuration.
- Built modular components achieving **75% code reusability**, allowing **faster feature rollouts** and simplified updates.
- Focused on user experience with a frictionless, **signup-free preview** to improve onboarding and engagement.
- **Technologies:** React.js, TypeScript, Tailwind CSS, Node.js, PostgreSQL, Supabase, Zustand, Zod, Google Gemini, OAuth2, Gmail Api

My Pocket (Password and File Storage)

Password and file storage app with user authentication.

password management and file storage with user authentication.

- **Technologies:** React, Node.js, Express, MongoDB

SKILLS

- **Frontend:** React, Tailwind CSS, Framer Motion, Typescript
- **Backend:** Node.js, Express
- **Database Management:** MongoDB, PostgreSQL
- **Tools & Frameworks:** Git, Postman, API Integration, JWT, Prisma, Zustand, Supabase, Zod, React-hook-form
- Agile Development
- Problem Solving
- Cross-Functional Collaboration
